D 99 C

Dynamic stereo-artificial head "Harry" — an imitation of the human head in attractive design. Enables the tape recording enthusiast to produce his own binaural stereophonic recordings. The perfect room impression and high-fidelity sound pattern achieved by reproduction via headphones will be highly appreciated by any tape recording enthusiast.

With approx. 7.5 m, attached twin 2-core screened connection cable and two 3-pin plugs DIN 41524.
